OUR STORY

After gaining valuable experience in building management, our founder, Sam, was driven by a vision for a more effective solution. When he found no existing answer, he took it upon himself to create one.

"MYBOS emerged from a fundamental idea: to simplify the lives of building managers and occupants by unravelling intricate systems through an all-in-one cloud-based building management platform."

From our user-friendly and intuitive interface to our easily comprehensible dashboard, MYBOS not only reduces inefficiencies and lag time but also eliminates unnecessary complexity.

From our modest origins to empowering the Top 100 Global organizations, with 460,000+ users, 6,800 building managers, and 2,100 buildings, we are reshaping industry standards.

MYBOS: Powerfully Simple.

BUILDING MANAGER APP

Prioritise. Plan. Execute

Building Manager App Overview

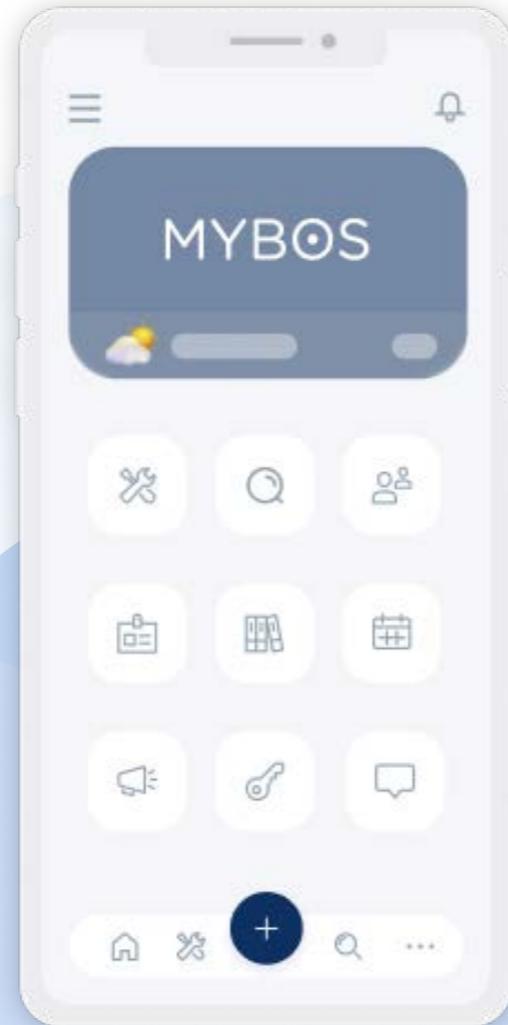

Introducing the MYBOS all-in-one Building Manager's App for efficient property management.

It features an all-in-one calendar to track events and happenings, monitor gas, electricity, and water usage, and log staff activities through an online shift log. Communicate with your maintenance team or tenants via live chat.

Easily access your contractor details, documents, and insurance. Store asset information, such as photos and warranties, in a centralised asset register.

Secure documents in the cloud for easy retrieval. Stay on top of maintenance work orders, preventative maintenance, budgeting, invoicing, visitor parking and more.

MYBOS is the ultimate tool for building managers.

RESIDENTIAL APP

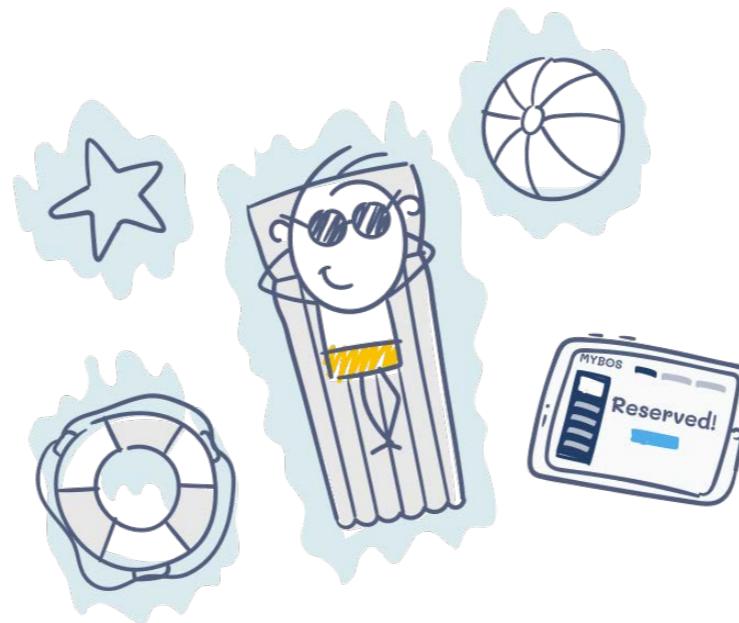

Enhance. Control. Enjoy

Resident App Overview

The MYBOS Resident App is an essential tool for residents in a MYBOS powered building. Its intuitive features benefit both tenants and building managers.

The app provides a business directory with details about local restaurants, bars, shops, and entertainment for owners, tenants, and guests. The digital community board allows you to inform fellow tenants about important events, social gatherings, or sell items on the community marketplace.

With the intuitive dashboard, you can manage maintenance requests, bookings, documents, and property announcements. The app also facilitates amenity request bookings and visitor parking arrangements.

MYBOS makes it easy for building managers to manage maintenance requests, stay informed and most importantly save time.
